A concept for perfect hand hygiene

Now is the time to make sure your washroom meets the latest hygiene standards. Satino by WEPA is here to offer support, with professional advice and a wide range of products.

Our towel dispensers are available in manual and touch-free formats, while our convenient Clean&Care dispensers can be filled with soap or hand sanitiser.

Why hygiene is so important

Children are curious and explore the world with all their senses. Every day, they encounter not just a multitude of objects, but also viruses and other pathogens. Wherever children come together to play and learn there is an increased risk of infections - which can spread rapidly in the classroom and on the playground.

Good hygiene (paired with clean washrooms) is essential for preventing the spread of germs and illness. So, it's important that children understand the benefits of cleanliness and regular handwashing.

Together, we can develop a professional washroom concept to meet your school's needs. Through cooperation, we can help educate teachers, parents and pupils regarding proper hand hygiene.

Hygiene at school – a guide for kids

WEPA Professional is supporting schools with a child-friendly video all about proper hand hygiene. It provides helpful advice on what children can do to prevent the spread of germs during the pandemic including keeping your distance, sneezing into the inside of your elbow (rather than into the air), and washing and drying your hands thoroughly.

Want to dry hands properly? Paper towels are the way to go

Paper towels are the most hygienic hand-drying method – for many reasons.

- ✔ **Hygienic:**
the friction of a paper towel helps to remove residual germs left behind after washing. Plus, each towel is single use meaning it can be disposed of when you are finished. They can also be used to turn off the tap, open the washroom door, or simply for blowing your nose.
- ✔ **Clean and efficient:**
one individual towel per user.
- ✔ **Convenient:**
no noise, no lines.
- ✔ **Safe:**
hand dryers disperse viruses and other microorganisms throughout the room and onto surfaces, while textile towels carry the risk of cross-contamination. With paper towels people only touch the towels they use themselves.

Hygiene on-the-go: Meet our new cardboard dispensers

Looking for hygiene options that give you flexibility?

Our new recyclable towel dispensers are an ideal solution: Ready for use wherever hygiene is needed, these boxes are robust, made of cardboard and available in white (for damp wiping) or brown. Attach to your preferred surface using adhesive tape, screws or a cord to the rear.
