

Satino Services:

# The circular solution for your organisation

**The paper retrieval service from Satino Services makes it possible:** used paper hand towels from your organisation become the raw material for your new hygiene paper. With this circular solution, you measurably reduce waste – while achieving significant environmental savings and strengthening sustainability.

## 01

### Your Organisation

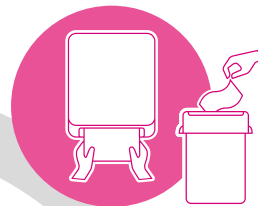

You use paper towels to dry your hands in your organisation's washrooms.

## 02

### Washroom

Used paper towels are disposed of separately in the washrooms.

## 03

### Collection

The paper towels are collected in separate containers, picked up by our waste disposal partners and pressed into bales.

## 05

### Recycling

New products are manufactured from the processed paper fibres. **The cycle is complete.**

## 04

### Transport

The collected paper fibres are transported to WEPA, where they are processed and returned to the paper cycle as a valuable raw material.

Less waste, more sustainability:

# We make circular economy possible for you

**Rest waste reduction, conserving resources, protecting the environment: Satino Services makes exactly that possible.**

The approach is simple. Your used hand towel paper is no longer disposed of as residual waste, but collected separately and used as a raw material for the production of new hygiene paper. This paper is then used again in your organisations washrooms: the loop closes.

---

## The advantages of paper retrieval from Satino Services

- You measurably reduce residual waste in your organisation and thereby achieve environmental savings
- You contribute to helping your organisation reach its own sustainability goals
- You become part of an innovative closed-loop system and help conserve resources
- You benefit from our expertise as the market leader for recycled hygiene papers

We also support your company with comprehensive hygiene concepts and additional services – for example dispenser installation, dispenser leasing models or consultancy on sustainable washroom system solutions.
