

Professional hygiene in healthcare

Innovative solutions for the challenges of the industry

Sustainable hygiene solutions with a system – putting health and prevention first

Guaranteeing the highest standards of hygiene while ensuring the cost-effectiveness of equipment and materials is one of the biggest challenges in the care and healthcare sector, whether in hospitals, doctors’ surgeries, nursing homes or retirement homes.

- Satino offers tailor-made solutions to the economic, ecological and practical challenges facing the industry:**
- Comprehensive hygiene concepts for economical and sustainable operation
 - Safety thanks to high-performance soaps and VAH*-listed disinfectants
 - Smooth everyday processes thanks to reliable, maintenance-friendly dispensers – and practical services such as dispenser installation and rental agreements
 - Seamless hygiene through optimal availability of consumables
 - A better environmental balance thanks to sustainable products and return services – without compromising on quality

Sustainability: a topic for the future that is already relevant today

With particularly environmentally friendly consumables, the sustainable HYGINITY dispenser series and recycling solutions such as paper recovery, Satino is setting new standards in healthcare – and for the future.

2040

the British NHS wants to become the world’s first climate-neutral healthcare organisation in the world.

49%

of German hospitals have integrated sustainability into their corporate strategy, with a further 36% planning to do so – including through ecological purchasing standards.

80%

of medical specialists consider sustainability to be a high priority in hospitals.

* Association for Applied Hygiene: Products listed here meet the quality requirements for the effectiveness of chemical disinfection procedures in all infection-sensitive areas in accordance with the KRINKO recommendations relevant in Germany or recommendations from other scientific societies, as well as the requirements of the currently valid DIN EN standards for the respective area of application.

Hand hygiene – the key to safety and cost efficiency

Thorough hand hygiene saves lives: it prevents the spread of germs, protects patients, staff and visitors from infections and measurably reduces the number of infections. This ensures safety and better care, fewer cases of illness and greater cost efficiency in the workplace.

2.6 million

people in Europe are infected with hospital germs every year. 91,000 die from their infection, 15,000 of them in Germany alone. A third of these deaths could be prevented – primarily through consistent hand hygiene.

11,000 Euro

is the cost of the additional treatment for hospital infections in Germany per case – a burden on the entire healthcare system.

Paper towels – recommended by science

Hospitals and healthcare organisations recommend paper towels:

They are proven to be the most hygienic way to dry your hands. Satino offers a wide range of hygiene papers that optimally meet sustainability and individual requirements – including the particularly sustainable Satino PureSoft.

Dispenser systems – crucial for hygiene and comfort

The HYGINITY dispenser series from Satino was developed in collaboration with microbiologists. The Clean&Care arm lever dispensers for soap and disinfectants and the touch-free solutions for paper towels effectively prevent contact infections – because dispensers must not become a hotspot for germs.

Satino’s captive systems for soap and disinfectants ensure both safety and comfort:
The pump is integrated into a particularly leak-proof stand-up pouch, which can be replaced with a single movement. KRINKO** expressly recommends disposable systems such as this.

** Commission for Hospital Hygiene and Infection Prevention at the Robert Koch Institute (RKI)

Your partner for sustainable hygiene concepts in healthcare

Our product recommendations for you

Satino PureSoft:
Sustainable hygiene paper made from recycled cardboard. Hygienically safe, dermatologically tested and particularly soft.

Satino HYGINITY:
The new standard for hygiene dispensers in healthcare. From touch-free soap dispensers to efficient paper dispensers that deliver every last sheet.

HYGINITY Sensor towel dispenser:
maximum hygiene thanks to touch-free operation; highly efficient battery or power consumption, flexible settings for paper length, pause intervals and feed.

Satino soap and disinfectants:
extremely kind to the skin and the environment. Up to 2,500 applications per cartridge, 100% free from allergenic ingredients and made from 100% natural raw materials.

Consulting on equal terms – your washroom concept from Satino

Satino – the sustainable professional brand from WEPA

Our goal:

In line with the Paris Climate Agreement, WEPA aims to reduce CO₂ emissions by 52.5% by 2030.

Our vision:

CO₂ neutrality by 2040 – to achieve this, we are investing specifically in renewable energies such as solar and wind power, hydropower, biomass and biogas.

Find out more about sustainability at WEPA here.
