

# Easy-care & hygienic:

## Cleaning instructions for your HYGINITY dispenser series

The HYGINITY dispensers combine elegant design with maximum functionality. To maintain their brilliant appearance and hygienic cleanliness in the long term, we recommend regular, gentle cleaning - because a well-maintained washroom is more than just a functional place: it is the silent calling card of your property and makes a lasting first impression on your customers.

### To clean your HYGINITY dispenser properly:

- ✓ Use a soft, lint-free cloth.
- ✓ Use suitable cleaning agents such as: mild surface or glass cleaners.
- ✓ A grease-dissolving cleaning agent is also recommended for cleaning fingerprints.
- ✓ Clean the dispensers regularly, especially in high-traffic areas such as the dispensing area.
- ✗ Avoid aggressive cleaning agents containing acetone or scouring milk.
- ✗ Do not spray the cleaning agent directly onto the dispenser, but onto the cloth with which you wipe the dispenser.
- ✗ Please do NOT use microfiber cloths - these can damage the glossy surface.

\*Care tips for internal and external use of the HYGINITY dispenser series.

Thank you for choosing HYGINITY dispensers. With the right care, your washroom will remain presentable and hygienic in the long term. For more information or for questions about the HYGINITY dispenser series, visit: [www.satino.eu](http://www.satino.eu)
